

Haglund Deformity Excision With Flexor Hallucis Longus Tendon Transfer and Achilles Tendon Double-Row Fixation

George T.S. Gendy, Kyle Zemeir¹

¹Midwestern University - Arizona College of Osteopathic Medicine

This video shows Haglund deformity excision with flexor hallucis longus tendon transfer and Achilles tendon double-row fixation. With this technique, a larger surface area is created for the Achilles tendon footprint and proper resection of the spur is ensured.
