

## **Endoprosthetic Scapular Replacement: History, Technique, and Function**

Yazan Kadkoy, Luis A Guinand<sup>1</sup>, Joseph Anthony Ippolito, Samuel Benevenia<sup>2</sup>, George Makris<sup>3</sup>, Joseph Benevenia<sup>4</sup>

<sup>1</sup>Rutgers-Njms, <sup>2</sup>Orthotin, <sup>3</sup>Orthotin LLC, <sup>4</sup>New Jersey Medical School

Patients who are candidates for limb salvage and have a functioning muscle unit (deltoid-axillary nerve) have greater motion and function with endoprosthetic total scapular replacement compared with resection arthroplasty-suspension.
