

Anatomical anterior cruciate ligament reconstruction with rounded rectangular bone tunnels using the quadriceps tendon

Junsuke Nakase¹, Yasushi Takata², Yoshihiro Ishida³, Naoki Takemoto², Manase Nishimura²

¹Junsuke Nakase, MD PhD, Department of Orthopaedic, ²Kanazawa University, ³Kanazawa-University

The technique presented not only aligns with the current trend towards using the QT in ACL reconstructions but also introduces rounded rectangular bone tunnels, which better mimic the native ACL's morphology.
